

Finance and Biodiversity Collaborative Engagements Overview

Annex 3 to the Guide on
Engagement with Companies

Financial institutions engaging with companies on biodiversity is a promising strategy for reversing nature loss. This document provides an overview of biodiversity-related collaborative engagements, with both collective engagements and joint investor letters.

Annex to the Guide on Engagement with Companies

This Collaborative Engagements Overview serves as an annex to chapter 3 of the [Guide on Engagement with Companies](#) (2022). By providing yearly updates, the Finance for Biodiversity Foundation and the EU Business & Biodiversity Platform want to help financial institutions navigate the ever-changing landscape of collaborative biodiversity engagements. This overview points financial institutions to ongoing engagements that they can join and provides information generated from past collaborative engagements.

Overview and updates

The table on the next pages provides an overview of ongoing and past biodiversity-related collaborative engagements of which we are aware. It maps the key sectors, realms and biodiversity challenges targeted, as well as which part of the value chain is engaged with. More background about these concepts can be found in the [Guide on Engagement with Companies](#). We welcome feedback, missing and new initiatives and input to be included in the next updates of this document at info@financeforbiodiversity.org and info@nextgreen.nl.

Fourth update, November 2024
